

TRANSMITTAL SLIP		DATE 5/26/58
TO: JAMES Q. REBEIZ <i>M.V.B.</i>		
ROOM NO.	BUILDING ADMIN.	NOTED - SA/PP/DC 5/27/58
REMARKS:		
<p>CitHatched memo from 25X1 to indicates what SAC 25X1 is doing to set up a civilian complement to carry on in the manner pioneered by HTA. I would expect some effort by SAC to attract some of our HTA specialists but won't let this interfere with our emphasis on cooperation with them.</p>

Proposed Civilian Staff for the SAC Photographic Exploitation Unit

1. Pursuant to my telephone conversation with Lt. Col. Condin on 15 May 58, SAC is planning to request this year a minimum of five civilians to be the nucleus of a much larger group over the next three years. At present the SAC has no civilian staff nor do they have the proposed center, but a large building is being constructed adjacent to the Headquarters building to handle the instrumentation provided by the HTA program. By the end of the second year they expect to have 15 civilian people on board, which will be their tactical staff for planning, production and programming. This staff will be made up of geodesists, mathematicians and photogrammetrists.

2. The top grade, under present planning, will be 14 or 15 and the major portion of the staff will be from GS-9 through 13. These people will be used in conjunction with military personnel as heads of departments and sections. The top man will be on the planning level and will be directly associated with a wing commander which now has the rank of Colonel or Brigadier General.
